

Roadtrek Green Certification "Snapshot"

Certification Level: BRONZE

Along with its truly innovative design, an unwavering commitment to quality and continuous improvement is the key to Roadtrek's success over the years. In addition, every Roadtrek meets and often exceeds rigid RVIA, CSA, UL, FMVSS, CMVSS, General Motors and Mercedes standards set for recreational vehicles. Each Roadtrek is also subjected to over 200 quality checks, inspections and tests. On top of all this, employees are responsible for the quality of their own work. Every vehicle is individually built with care and attention to detail.

Resource Efficiency

In-plant recycling of cardboard, wood, metal, wire; computer routers used during production to reduce material waste; floor mats made from carpet scraps

Energy Efficiency

LED lighting; ductless heating and air conditioning; soap pressurization test; ENERGY STAR TV; convection microwave

Water Efficiency

short hot water lines; plant rainbooth water and line-testing water is recycled

Indoor Air Quality

green-compliant carpet and hard flooring; low VOC insulation

Operation & Maintenance

Owner's manual that addresses energy efficient lighting, the importance of water & energy conservation, organic cleaners; customer training of mechanical equipment at dealer level

Innovative Practices

units are tested in rainbooth; reusable shipping containers from suppliers reduces packaging waste; 1% of profit goes to charity

*NOTE: not all units may include above features

Roadtrek Motorhomes

have achieved a "BRONZE" rating

Green Categories	Performance Level Points			
	BRONZE	SILVER	GOLD	EMERALD
Resource Efficiency		X		
Energy Efficiency			X	
Water Efficiency	X			
Indoor Environmental Quality	X			
Operation & Maintenance			X	

This rating is based on the minimum level achieved in accordance with a 2008 ANSI approved consensus standard. Certain elements of the standard are not applicable such as lot design, preparation and development. Green Certification of the motorhome does not include analysis of the chassis.

Certification awarded January 2012

TRA Certification is an internationally accredited 3rd party specializing in green building certifications.
